

Dippy

the DIPLOMACY (the game created by Allan Calhamer and now owned and marketed by Avalon-Hill Corp) supplement of the Sunday Western, Star-Post-Free Press, Vol 9, No 4, March 15, 1981

DIPPY is published by the Great Western Publishing Co & Whalebone Corset Works, Inc, a.k.a. Jim Benes, 417 S Stough St, Hite Dale, TN 38521. Game fee is \$6 plus a continuing subscription to this ra at the rate of 4 issues/dollar.

IN A RECENT ISSUE of Steve McLendon's excellent (and recommended) publication, THE DRAGON AND THE LAMB, Doug Beyerlein suggests that all Diplomacy players and publishers agree to take the month of August off to recharge their batteries. We think that's billy. We, for instance, plan to be off on vacation in June of this year, not August. And we, as well as all of you players out there, probably all have differing vacation schedules. That means that if these schedules happen to coincide with the suggested August hiatus so much the better. If not, well, that's too bad. So, suggesting an August DIPLOMACY hiatus would seem silly on the face of it to be discriminatory to ~~my~~ many DIPPY players and publishers.

PARIS—There was wide-spread concern throughout France today because of the English failure in the Mid Atlantic. Reaction ranged from anger to despair. In Brest the

citizens were blockading the streets and preparing for the worst. French nationals in Spain were seen streaming ~~far~~ back over the border into France. In Paris, the accusations about why the English advisors were listened to over the advice of General DeChump, were shouted throughout the great halls of Versailles. General DeChump, himself, stated "If only we had done what we had first planned to do..." As a result of the English strategy all ~~English~~ English advisors have been expelled. GORSKI HOME FIRE BOMBED

By Angelo DeCavalcante, STAR Organized Crime editor

HINSDALE, Mar 8—FBI agents have been brought into the investigation of the throwing of a Molotov cocktail thru the living room window of the Gorski mansion here.

Fortunately, the device did not ignite. It was discovered this evening by the Madame de Solange de Gordoal upon her return home from a vacation in the southern climes.

Gail said, somewhat matter-of-factly, "Well, it will give Ron (the Squire of the home) something to do when he returns home...and it will give him something to complain about too."

At first it was thought that the device had been thrown by thugs connected with the Chicago mob, but when witnesses reported they had seen a black Volga limousine speeding from the scene, federal authorities were brought in. Stay tuned for further developments. Perhaps the incident is in some way related to the following story:

WILL RESIGN AS TBA
COMMISSIONER
BULLETIN

By C D Workman, STAR
Labor Ed

CHICAGO, March 11—John McArdle announced today that he is taking a job with a new firm, Wood, Herron & Evans, of Cincinnati, Ohio.

John will begin work in Cincy April 1st, will commute weekends to the Chicago area to get things wrapped up, and then move his family East to Ohio by summertime.

Asked by the STAR for reaction to this great change in his life, McArdle could only stammer: "Heh, heh...Ooooh.. No more commuter trains."

Because McArdle does not figure to return to the Chicago area very frequently, perhaps once in five years, he will be resigning his post as Commissioner of the Transcontinental Basketball Association. A new election will be held shortly.

Congratulations on your new appointment, John! The best of luck to you! We're just sorry that there probably will never be another New Year's or Food Feast at which we can get blasted together again...

ALSO MAKING A CHANGE:
Doug and Gail Durham who have forsaken the peace and quiet of Naperville for an apartment in the city. Look for a push now for realignment involving Durham's Augusta Winds of the TBA. It had been rumored that he wanted out of the Roundtable, but to up and move?

POINT

By Len O'Royko

Shana, you insolent elut. I don't want to get into a pissing contest with you, because you'd win, and I respect you for it, BUT,

Everybody knows American workers are working less, hence, they don't deserve a pay raise. They may need it, as you say, but, they don't deserve it.

Take your own left-wing self for example. You are a non-producer. You don't deserve a raise, not even a day's pay!

Productivity of American workers has been sliding for the past few years, yet, American workers are getting pay raises. So they are producing less, and making more money. That cheapens the American dollar. It takes more dollars to buy the same item.

Yes, I agree with you that big ~~mass~~ corporations are making jillions in profits, and that some of that should be shared with the workers. BUT YOU LIBERALS BOIL MY WATER! That money is needed, and is used, for re-investment. Oil companies are spending billions for new ways to find oil, develop shale oil, off-shore projects, solar energy, etc. Hence, more jobs, and more exchange of dollars. A healthy economy!

But workers want the pay raise instead. They're not worth it. Their productivity is down. Meanwhile, the slopes have turned the tables on us and are outproducing us...one Japs are beating us at our own game. And you want to know ~~why~~ why? It's hard to ~~figure~~ imagine that a little nip-jap out-produce a brawny American, but it's true, because they don't demand pay raises, they demand and get a way of life. The fringes at a gook plant are better than ours. They get a tea break, some get free rides to and from the workplace, and most factories have a clean, healthy environment. Besides that, larger plants have built in physical fitness facilities for their workers. And that really helps. An American company figures a ~~fx~~ factory worker in good physical shape saves the company 700 dollars annually in increased productivity.. look at our workers...overpaid and overweight.

So Shana, take off the blinders. Quit nagging big business and protecting what you self-proclaimed liberals like to call the "common man." The only thing they have in common is greed!

COUNTERPOINT

By Shana Dymshytz

Len, it never fails to amaze me how many ways you can find to make yourself look like a simpleton and ~~as~~ a boob.

I was reading just the other day that big business didn't mind giving out what you would consider to be a whopping pay increase to its workers. Why? Because a 10%-8%-7% contract over three years in these days saves the company, as you might say, jillions! That's right, because 25 percent in wage increases over three years is less than the rate of inflation. Hence to give out raises like this is, if anything, deflationary, because those dollars three years from now will be cheaper than they are now, and the company if it wishes, would be able to market its product at a comparatively cheaper price,

And, come off it about the Japanese! Among the benefits they have is lifetime guaranteed employment. I'll betcha that's one thing the workers at Chrysler Corporation would love to have. And speaking of benefits, where ever did you get the idea that they don't cost the company anything? Management is always screaming about the cost of increased benefits. Benefits are just another form of compensation for the worker. So what difference does it make if the worker gets it as a package of benefits, like free dental care, or as cash on the barrelhead. It's still all the same thing to the company.

The real reason, which you ignore, for the Japanese industrial success is that they were bombed back to the stone age during World War II. All of their heavy industrial plants are newer, more energy efficient (and that's probably the biggest factor these days) and more technological-ly advanced than the relics that our workmen toil in. It's the same thing with the Germans for the same reason.

They got the chance to start from scratch with new and modern equipment and systems, while our tax-laws make it more desirable for a company to continue until bankruptcy at an old energy-wasting mill rather than to invest in new facilities. The tax laws need changing here, and let's hope that those woolly friends of yours in the government will do something about it. Had they done so earlier, then you'd have no real excuse for bringing up the matter of re-investing profits. If the tax laws were written properly, that would be the course of action today.

ALL GAMES DUE BY MARCH 15

TBA ROUNDP

DENVER, March 12—The announcement by Commissioner McArdle that he will be resigning to move to a more lucrative position in Cincinnati has thrown some league members into a tizzy of consternation. It's expected that the new commissioner will be faced with a wide variety of issues relating to the league structure in 1981-82 and that means divisional realignment and the possible folding of several unstable franchises. More to come.

Meanwhile, Ed Leswig has contacted the Commissioner's office expressing great expectations that he will be awarded a franchise for the upcoming season. Ed is pushing for full control of the Lincoln Park Unknowns. If Ed gets that franchise or any other, he plans to move it to Peshtigo, Wisconsin, where it will be known as the Peshtigo "Fire." Already is

Leswig making plans. He has secured a lease on the Marinette County Fire Memorial & Field House except for a few dates which now have been taken by the Marinette County Quilting Club.

A split with mighty Bolingbrook gave Augusta's Winds a final record of 9-9. And Ralston Arena asked Winds Coach Clyde C Netzley to summarize: "We have a lot of rookies on this squad, and while most of them are small, all of them are extremely slow! We knocked the snot out of some weaker teams and got the bee-jeezus kicked out of us by others just as weak. It was like coaching Naperville all over again." (PTG)

TEAM SALE (continued from page one)

Universal Baseball Association (UBA) to "Sovie!" interests. The former team owner, J M Gillespie, will be retained as club president.

The STAR reached Mr Gillespie at his Chicago office, where in answer to questions as to why he sold, who the new owners were, and why they were interested in the Stars, Gillespie said: "I don't know the newowners too well—to me, they're just three guys named Vladimir. I think they said they were in the plumbing business over there. I gather they were interested in the team because of its logo." The Hollywood Stars' uniforms are emblazoned with a red star.

The Wall Street Journal carried an unconfirmed report that part of Gillespie's compensation consisted of all the oil, gas, and mineral rights to Siberia. Gillespie would not comment on that, but he was seen buying dinner for fellow UBA owner J T "Theo" Benes—an uncharacteristically charitable gesture by the Scottish-Czech Gillespie.

Izvestia reported the official reaction of the US State Dept in which Secy of State Haig alleged that the Hollywood team had in fact been acquired by the KGB, and condemned Haig's comments as "the mad ravings of a warmongering stooge of the US military-industrial complex." In Washington, US Kremlinologists expressed surprise at the unusually mild tone of the Soviet comment.

In a related development, Pravda reported that another UBA team, the Devil's Slide Sidewinders, had been acquired by the People's Republic of China. The newspaper termed this a threat to world peace and warned of a "Yellow Peril."

And in Washington, the STAR has learned that the Senate Foreign Relations Committee is engaged in an investigation of charges that the Niles Reds have been acquired by the government of Albania. (ABBA)
